

## WASTE OIL DRAIN UNITS FOR PITS AND FLOOR

Mobile gravity waste oil drainers are suitable for draining engines, gearbox and differential oil. Collection unit with 50 litres volume is supplied with anti-splash screen useful also for filters draining. Gravity drain unit is discharged using a wall mounted pump kit and quick coupling set (see pictures). Oil impurity suction is avoided by an internal filter assembled inside the mobile drainer. Pit version is fitted with adjustable steel wheels for mounting on pit rails. Floor version is provided with a folding handle, front fixed wheels and rear castor wheels.
